

**WILLIAM JOHN FLEMING**  
Principal

William J. Fleming has maintained a professional design career for over thirty-years. Registered as an Architect, Bill spent his formative professional life at some of the best design firms in the Boston community. Starting in 1972, Bill worked in firms that specialized in urban housing, campus planning and hospital projects. While attending the Boston Architectural Center (BAC), Mr. Fleming continued his professional experience with elderly housing, condominiums and HMO facility work. During these years, Bill developed a contextual approach to landscape architectural projects.

Combining architectural and landscape experience lead Bill to work in landscape/art master planning projects in the Middle East. Mr. Fleming has traveled to Saudi Arabia, Kentucky and Los Angeles adding to a broad perspective of environments and a wide range of client goals.

Most recently, Bill has leaded the firm through a wide spectrum of assessments from interior plantscapes to large-scale retail permitting. Mr. Fleming brings his attention to detail to all projects, including private estates, high-end condominiums, office parks, affordable housing, parks and children's playgrounds, regional resort rehabilitations, specialty lighting and health care facilities.

The firm has received several awards for high-end residential design and innovative landscape design approaches to environmental constraints / issues. Over many years, WFA's commitment to its clients, project goals, providing sensitivity to environmental, historical and social economic issues have strengthened the firm's resolve to help make its portfolio a benchmark for the future.
